

Catalog No. : 53-\*-860R

Diffraction Order : 0

Master No. : 0891

Groove Frequency :

150 g/mm

Grating Type :

Plane Ruled

Coating :

Aluminum

Nominal Blaze Angle :

17.5°

Blaze Wavelength :

4  $\mu\text{m}$

Maximum Ruled Area :

102 x 128 mm

Remarks :

**Note:** Efficiency curves shown are absolute, are only representative, and can vary significantly depending on use geometry and measurement technique. Two masters with the same catalog number may have different efficiency curves. The uncertainty band on the data in the above relative efficiency curve(s) is  $\pm$  three percentage points. Maximum Ruled Area is expressed as L x W, where L is the length of the grooves and W is the ruled width.
